organization

33% higher
productivity, analytics
teams

CUSTOMER QUOTE, FINANCIAL TECHNOLOGY COMPANY:

“The most significant benefit that we see with Red Hat solutions for our SAP environment is getting the uptime that we need, the system just runs. . . We're more agile and we can actually deploy during the day, with minimal disruption, so there's a lot less planned downtime.”

IDC's study demonstrates the value for organizations of running their business-critical SAP environments, including SAP S/4HANA®, on Red Hat enterprise open source solutions. Study participants reported that their use of Red Hat solutions has enabled the performance, reliability, and scalability required for creating value with SAP, even as they benefit from more efficient infrastructure and security teams.
