

Accelerate Your Cloud Initiatives with Rackspace

Navigating your cloud journey can be costly and complex. Don't go it alone.

Accelerate Your Cloud Initiatives

Cloud and cloud-enabled technology are helping state and local governments address many needs, from public safety to citizen service improvements. At the same time, digital transformation and remote work bring myriad challenges to state and local governments, like increased cost and complexity.

Research shows that 93 percent of state and local government IT decision makers are concerned about the state of their legacy applications or systems, and 92 percent of that same group have new cloud investments planned for 2022.
