

# Six Best Practices to Seamlessly Migrate ELT to the Cloud

Organizations need high-quality data and analytics for decision-making that results in competitive advantage. To make the most of data as an asset, organizations move from on premises data warehouses to the Cloud for agility, scale and speed.

42% of organizations that modernize to the Cloud consider optimizing ELT and data pipelines a main objective when doing so.

Take advantage of already existing ETL assets to draw up a migration plan that:

- Reduces risk.
- Maximizes ROI.
- Accelerates time to market.

Read “Six Best Practices for Seamless Migration of ELT Workloads to the Cloud” for all the details.
