

Dynatrace and DIY: A better together story

Join this webinar as technical experts discuss how to accelerate and mature your observability initiative. Whether you have a Do-It-Yourself approach or use a combination of multiple monitoring tools, this webinar will help you understand:

- Current approaches and challenges with observability
- What are the true costs of observability?
- What you can do now to stay ahead and maximize the value of observability
- How you can scale the efforts of your observability team
- How Dynatrace can enhance your current opensource initiatives such as OpenTelemetry & Prometheus
