

Explore 107% ROI with Prisma SASE.

Forrester TEI study examines the benefits and cost savings of deployment.

Secure access service edge provides a unified cloud solution for organizations with branches and remote workers. A strong SASE solution not only solves connectivity and security challenges, it creates operational efficiency and significant long-term cost savings.

In December 2023, Palo Alto Networks commissioned Forrester Consulting to examine the potential return on investment organizations may achieve by deploying Prisma SASE. The Total Economic Impact™ (TEI) of Palo Alto Networks Prisma SASE offers independent operational efficiency guidance. Results are for a composite organization representative of interviewed customers.

Prisma® SASE is a complete SASE solution, converging network security, SD-WAN and Autonomous Digital Experience Management into a single cloud-delivered service. It also offered significant ROI. Explore the analysis further in the Forrester TEI study.
