The 13 Providers That Matter Most And How They Stack Up

January 25, 2024

Andrew Cox

with Merritt Meakin, Caroline Rowatt, Christine Trelvy

Summary

In our 21-criterion evaluation of cloud workload security (CWS) providers, we identified the most significant ones and researched, analyzed, and scored them. This report shows how each provider measures up and helps security and risk (S&R) professionals select the right one for their needs.

As cloud becomes the de facto infrastructure choice for organizations, development and security teams are looking to effectively secure their increasingly large and complex cloud environments against an evolving set of new risks.

The Forrester Wave™: Cloud Workload Security, Q1 2024 analyzed the top 13 providers that matter and recognized Wiz with the highest possible score in the current offering category.

- A comprehensive view of the top CWS solutions in the market.
- How the CWS market is rapidly consolidating previously siloed security solutions.
- Which CWS solution best meets your business needs.
