

G2 Grid Report: CSPM for Mid-Market

For security and risk leaders, mapping out and visualizing all the components of a complex cloud can be more than challenging, and nearly impossible. Let alone identifying misconfigurations or mistakes across this ever-changing environment. Let alone identifying Wiz is a Cloud native application protection platform designed to secure the cloud attack surface in a cloud native manner while providing visibility, prioritization and helping every cloud security team. With over 300 customer reviews, Wiz has been named the #1 leader for Cloud Security Posture Management for MidMarket industries with:

- 97% users rated the Wiz Platform 4.7 out of 5 stars.
- 100% confidence the product is going in the right direction.
- 95% of users likely to recommend Wiz.

This grid can help technology buyers quickly select the best products for their business.
