

# Invest your AWS committed spend on Red Hat solutions

## Invest your AWS committed spend on Red Hat solutions

If your organization has opted to participate in an enterprise discount program, like the one offered by Amazon Web Services (AWS), you are probably familiar with the flexibility and savings you can take advantage of during your fixed-term contract.

Many organizations fail to use all of their committed spend, which is like leaving money on the table.

Your committed spend with AWS extends to Red Hat solutions, which you can use to enhance your existing environment, bring solutions co-developed and managed by Red Hat and AWS, or get the tools you need to create efficiently, deliver high-quality customer experiences, and scale to meet changing demand, using the spend you already have.

**Why Red Hat and AWS?**

Red Hat and AWS tools can help you scale infrastructure and effectively use technology such as containers, Kubernetes, and modern hybrid cloud architectures. Red Hat and AWS offer a logical cloud environment that can help you modernize IT management, reduce complexity, innovate efficiently, and prepare for the future. With Red Hat and AWS, you benefit from 2 leading companies that help organizations build a more unified hybrid cloud experience.

**Why you can use your committed spend**

Find tools and technologies to scale infrastructure and expand opportunities to adapt to market demands using your AWS committed spend built into the console and through AWS Marketplace listings.

Consider: If you purchase Red Hat Enterprise Linux<sup>®</sup> through your personalized AWS console, you get 50% credit with your committed spend.

- Red Hat Enterprise Linux
  - Red Hat Enterprise Linux the #1 paid Linux server
  - An open platform for customers who seek deployment flexibility for business-critical workloads
  - Offers a consistent foundation across environments
  - Provides tools needed to deliver services and workloads efficiently
  - Provides hybrid cloud flexibility for developers and operations teams
