

Rapidly migrate from CentOS Linux 7 with cost-effective solutions

The screenshot shows the Red Hat Enterprise Linux website with the following content:

- Red Hat Enterprise Linux**
- Rapidly migrate from CentOS Linux 7 with cost-effective solutions**
- Choose a platform to support your business initiatives now and in the future**

Organizations that use CentOS Linux[®] currently face a choice. The CentOS Project will discontinue all updates and releases of CentOS Linux 7 after June 2024. As a result, CentOS Linux users must migrate to a new operating system (OS) to continue receiving updates, patches, and new features. While implementing a new OS may seem tedious, it also presents an opportunity to reassess your organization's needs and choose a platform that will better support your business and IT strategies now and in the future.
- Red Hat offers a set of tailored, cost-effective offerings to help you transition smoothly and quickly from CentOS Linux 7 to Red Hat Enterprise Linux.**
- Ease your migration with low-cost, high-value offerings from Red Hat**

Red Hat Enterprise Linux for Third-Party Linux Migration is a set of comprehensive, ground-breaking offerings for current CentOS Linux 7 users. All of these offerings include access to:

 - Red Hat Enterprise Linux Server.** Organizations of all sizes across industries can benefit from this complete, intelligent operating system for mission-critical and enterprise hybrid cloud deployments.
 - High availability (HA),** Deploy managed, highly available clusters of Red Hat Enterprise Linux systems to drive reliability, scalability, and availability to your critical production services.
 - Containerized, host.** Convert your CentOS Linux 7 systems to Red Hat Enterprise Linux 7 systems in-place. Using Containerized, keeps your existing customizations, configurations, performance, and results in a supported instance of Red Hat Enterprise Linux 7. This tool works with RPM-based Linux distributions and is fully supported for conversions from CentOS Linux and Oracle Linux.
- Organizations that need more time to plan and prepare to migrate from CentOS Linux 7 to third-party Linux can take advantage of the Red Hat Enterprise Linux for Third-Party Linux Migration with Extended Life Cycle Support offering. This 2 offering includes 4 years of Extended Life Cycle Support (ELCS) with access to Red Hat Enterprise Linux 7 security patches and updates until June 2026.**
- Red Hat Enterprise Linux for Third-Party Linux Migration offerings will be available for on-site datacenter deployments and on Amazon Web Services (AWS), Microsoft Azure, and Google Cloud as optional provider marketplace and Red Hat Cloud Access.**
- From offering, see details on the Red Hat Enterprise Linux distribution, including CentOS Linux 7. For more information, see the Red Hat Enterprise Linux distribution, including CentOS Linux 7.
