

Recommendations for day-1 Kubernetes fleet operations with Tanzu Mission Control

Technical White Paper, June 2022

How-To Guide: Day 1
Operations with VMware
Tanzu Mission Control
Getting started

vmware

Introducing containers means that Infrastructure & Operations teams need to keep pace with faster and more frequent development delivery. With more frequent infrastructure redeployment, I&O teams can get bogged down in manual processes. VMware® Tanzu Mission Control helps organizations by centralizing cluster redeployment and management tasks so I&O teams can be more efficient and maintain velocity.
