

Reimagining ZTNA: How Lookout Secure Private Access Solves the Data Problem

Reimagining ZTNA

How Lookout Secure Private Access
Solves the Data Problem

Today's work environment is filled with challenges — especially when it comes to protecting data. While the ‘work from anywhere’ culture has accelerated productivity, it’s also made traditional perimeter-based security obsolete.

Lookout Secure Private Access offers IT and security professionals a comprehensive, data-centric way to protect your data and users.

- Why traditional security is no longer adequate
- What a zero trust network (ZTNA) solution requires
- How Lookout simplifies security while lowering costs
