

The Data Streaming Revolution Comic Book: Rise of the Kafka Heroes

A captivating comic that will ignite the imagination of developers and technical architects interested in Kafka and event-driven architectures! Join Ada and Jax and venture through Batchland – a stagnant, inefficient world representative of NewLimits’ current state, they are guided by Iris, a master of data streaming. Together, they discover how Apache Kafka® and Confluent hold the keys for unlocking real-time capabilities for NewLimits. They must now embark on a race against time to build a proof-of-concept, before the Batch Gang tries to sabotage their plans.
