

Zero Trust IAM: What Federal Agencies Need to Know

When the Biden Administration issued Executive Order (EO) 14028 on Improving the Nation’s Cybersecurity in May 2021, it brought a reinvigorated focus to cybersecurity, setting into motion a series of actions by federal agencies, including the Office of Management and Budget (OMB), the National Institute of Standards and Technology (NIST), and the Department of Homeland Security’s Cyber and Infrastructure Security Agency (CISA).

Identity & access management (IAM) is one of five “pillars” in the Executive Order. Download this Industry Brief to learn about the identity requirements mean for federal agencies, and what guidelines to keep in mind to achieve a successful Zero Trust implementation.
